Tridon Europe Announces the Acquisition of MPC Industries

Combining Pan-European Leaders in Clamping Solutions

Kudowa, Poland – 9 March 2022, Ideal Tridon Group, a leading manufacturer of clamping, coupling, and support products, is pleased to announce the acquisition of MPC Industries. Founded in 1981 in Gorredijk Netherlands, MPC offers the MPC® uniting product line that includes worm drive clamps, pipe connectors in various sizes, and custom solutions. Each product is adaptable to a wide range of industries and applications.

“The acquisition of MPC Industries by Tridon Europe and the Ideal Tridon Group is exciting for our company and the entire European market,” said Kris Tirry CEO of MPC. “At MPC, we’ve always worked from the philosophy that working together and sharing knowledge helps us and others to excel. Combining our companies, our products, and our mutual commitment to quality and customer service offers European customers the best source for their uniting solution needs. In joining our local expertise, extensive industry, and product knowledge with the manufacturing capabilities of Tridon Europe, customers have a partner they can rely upon. This combination adds tremendous value for our customers.”

Ideal Tridon serves a diverse set of end global markets by offering a broad portfolio of highly engineered clamp, coupling, and strut support systems. This is the most recent acquisition for Ideal Tridon, uniquely positioning the combined companies to serve European customers with an unmatched industrial product portfolio.

“MPC Industries built a strong company led by their commitment to quality and customer service. Their uniting products and culture of service align perfectly with the Tridon Europe and Ideal Tridon philosophy. Meeting and exceeding European customers’ expectations has been their hallmark. Combining our companies provides the most complementary and expansive platform for clamping, hose, and pipe support products in the world.” said Rick Stepien, CEO of Ideal Tridon. We could not be more excited about the future.”
